F3 CHAFF CUTTER

STREAMLINE BY  HANSA™

Hansa have long held a close relationship with Streamline Feed Systems. Hansa's founder, Manfred Vogel, and Streamline's founder, John Turner, shared a passion for innovation and quality products. They shared ideas, collaborated and even joined sites back in the early stages of their businesses for Fieldays.

When John Turner retired, the Streamline chaff cutters – one of the brand's bestselling products – became discontinued. Sharing Hansa's values, John's grandson joined the Hansa team for 18 months and helped to bring back the old favourite - now re-engineered for the modern age.

Provide the best feed for your animals using the Streamline chaff cutter by Hansa. It has the most refined cutting mechanism of any machine on the market, creating the most consistent output chaff.

The streamline chaff cutter can cut various types of hay, lucerne and grasses, saving you money and time by producing your own chaff, knowing what the output feed contains.

The machines safety features including safety switches on guarding and emergency stop button provides peace of mind for any operator. Its compact size, with folding inlet chute makes for easy storage.

While servicing and maintenance requirements are minimal, its design lends itself to easy cutting reel removal for sharpening and setting to anvil.

TECHNICAL SPECIFICATIONS

Engine	2h.p. electric motor
Max Power	2h.p.
Dimensions (l x w x h)	1650x1505x850 (in folded state: 1030x1205x850)
Weight	148kg
Fuel type	Electricity
Wheels	270mm pneumatic
Reel	12 blade spiral reel
Belts	2x Z53 belts
Start	Electric
Outlet dimensions	330x110 (383x155 outer edge – circumference 970mm)

FEATURES

- Inlet folds for storage
- Suits catch bag with opening circumference of 970mm or more
- Wheels for transport and handles for manoeuvring
- Solid construction with steel body
- Powder-coated for a durable finish
- Safe operation – guarded belts, guarded inlet with PET safety shield, E-stop & lock out switches
- Easy-feeding system
